SoundWaters Welcomes Weston High School Student Intern

WHS Senior, Jackson Quist, Selected as Spring 2017 Intern

Stamford, CT – SoundWaters, the Stamford-based environmental education organization, has selected Weston High School senior, Jackson Quist, for its spring internship program. Quist will be working for five weeks at the organization’s Coastal Education Center at Cove Island Park in Stamford. He is part of a larger group of spring interns from several high schools who, instead of attending classes for the final weeks of their high school careers, work in internships to experience a real-world business environment.

At SoundWaters, Quist will be working every day alongside and under the guidance of SoundWaters’ professional educators, teaching the science of Long Island Sound to elementary and middle school students from schools across the region. He is helping students in a classroom and lab setting, but also on the beach and in boats on Holly Pond where his young students do their field work. Over the five week period of his internship, Quist will work with over 1900 students from 13 elementary schools.

“SoundWaters is an amazing organization and I am lucky to have this internship. I get to work outside around the water with kids and help them learn about Long Island Sound and how to protect the environment,” said Quist, who added “I enjoy helping the students, but I’m also learning a lot about Long Island Sound myself and how a non-profit works.”

“The SoundWaters High School Internship Program is a model for professional development and environmental stewardship. Our interns develop their job and leadership skills on a daily basis as they perform scientific experiments, aquarium maintenance and assist with our STEM programs, reaching over 100 students each day. The SoundWaters intern program is a powerful learning experience,” said Alisha Milardo, SoundWaters Vice President of Education.

About SoundWaters

SoundWaters, founded in 1989, is the premier environmental education organization focused on the protection of Long Island Sound and its watershed. Annually, SoundWaters hosts shipboard and land-based programs for 32,000 children, including 11,000 from underserved communities. SoundWaters works in partnership with schools, communities, civic organizations, businesses and other environmental and educational organizations to develop experiences that foster a sense of responsibility for the environment and encourage actions that ensure the sustainable future of the Long Island Sound ecosystem.
