

## VASCULAR SYSTEMS

Based on what you learned in the video, fill in the table below comparing the cardiovascular system to the haemal system

	<u>CARDIOVASCULAR</u>	<u>HAEMAL</u>
<b>What types of organisms have this system?</b>		
<b>What liquid moves around in this system? What are the components (cells) in that liquid?</b>		
<b>What are the important structures/anatomy for this system? What do they do?</b>		
<b>What is carried around in the liquid for this system?</b>		
<b>Why is this system ideal for the types of organisms that have it?</b>
