

MICROPLASTICS

CIRCLE the pictures that represent types of microplastics:

What is one thing you can do to help reduce the amount of microplastics going into Long Island Sound?

Avoid using single use plastics that could end up in the environment. Once they are in the water, they just get smaller and smaller and become microplastics.

Make sure to recycle so additional materials won't be in the environment.

Avoid any cosmetic products that use microbeads.
